Architect's Blend is a granulated, homogenous blend of diverse organic meals and other nutrients. It's used as a general fertilizer or pre-plant fertilizer and soil amendment for sand-based golf courses, athletic field construction and landscape applications.

Architect's Blend combines naturally-occurring and other nutrients selected for their release and availability characteristics as well as their root zone enhancing properties.

Application Guidelines

Rake into the top 2.5 to 8 cm (1 to 3 inches) of root zone prior to seeding, sodding or sprigging.
